The paper studies the methodical approach to building mathematical models for timing determination of illegal actions on information resources of computer systems in order to substantiate requirements to methods and facilities of protecting information from unauthorized access. In the paper a version of the logical-linguistic representation of functional description of such activities as a tool of their primary formalization was adduced.

Keywords: *information security, data protection facilities, unauthorized access, mathematical modeling.*

Skryl S.V., Dr. Sci. (Eng.), Professor of the Information Protection Department at Bauman Moscow State Technical University. Author of over 100 scientific papers, 7 patents, 15 educational works in the field of information protection.

Mozgovoy A.V. (b. 1986) graduated from Bauman Moscow State Technical University in 2009. Assistant Lecturer of the Information Protection Department at Bauman University. Author of over 10 papers and 1 methodical instruction in the field of information protection. e-mail: runc.nsd@gmail.com

Dobrychenko A.I. (b. 1987) graduated from Bauman Moscow State Technical University in 2011. Assistant Lecturer of the Information Protection Department at Bauman University. Author of one publication on the protection of state secrets.
