Bauman Moscow State Technical University, Moscow, 105005, Russia

Methodological principles of the instruction of model-based control systems design are discussed. On the basis of project management and project support systems a team-oriented instruction of control systems design in visual simulation environment in technical universities is proposed.

Keywords: *model-based control system design, model-based design, teamwork, team collaboration.*

Sivtsov V.I. (1942–2013), Ph.D., Assoc. Professor of the Automatic Control Systems Department at Bauman Moscow State Technical University. Author of more than 60 scientific works.

Talukder Yu.Z. (b. 1985) master of the Automatic Control Systems Department of Bauman Moscow State Technical University. Author of five scientific works. e-mail: ytalukdar@yandex.ru, yuri.talukdar@gmail.com
