
About the history of the All-Russian competition in theoretical mechanics

© G.I. Dubrovina

Bauman Moscow State Technical University, Moscow, 105005, Russia

The article describes the conducting history of regional, All-Union, All-Russian competitions in theoretical mechanics. The competition for the theoretical mechanics identifies gifted students, allows consolidate their knowledge, develop creative thinking, helps to learn the special courses, prepares students for research work at the undergraduate.

Keywords: *competition, theoretical mechanics, All-Union, All-Russian, university.*
