
Reliability asymptotic estimates of a system with redundant heterogeneous elements

© I. V. Pavlov, S.V. Razgulyaev

Bauman Moscow State Technical University, Moscow, 105005, Russia

Authors reviewed the problem of confidence estimation of reliability indices of the system with a loaded reservation within the various subsystems by the results of tests of its components (sub-elements). Were Obtained asymptotic (for the case of high reliability) expressions for confidence bounds for the reliability function of the system.

Keywords: *reliability, complex systems, reservation.*
