Bauman Moscow State Technical University, Moscow, 105005, Russia

Issues of robotization of ground forces are considered. The structure and characteristics of the existing ground-based military and special-purpose robotic complexes are described. The main problems in designing such complexes and ways of addressing these problems are considered.

Keywords: *mobile robots, autonomous motion control system, vision system, ground military and special robots.*

Korchak V.Yu. (b. 1955) graduated from Bauman Moscow Higher Technical School in 1978, Dr. Sci. (Eng.), Chairman of the Section of Applied Sciences within the Presidium of the Russian Academy of Sciences, author of more than 150 publications in the field of military planning.

Rubtsov I.V. (b. 1946) graduated from Moscow Forestry Engineering Institute in 1969, Ph. D., Head of Special Robotics and Mechatronics Department of Bauman Moscow State Technical University, Head of a department at the Research Institute for Special Mechanical Engineering of Bauman Moscow State Technical University, Winner of the RF Government Prize in Science and Technology in 2008, author of more than 100 publications in the field of robotics and control systems. e-mail: lapvs@rambler.ru

Ryabov A.V. (b. 1939) graduated from Bauman Moscow Higher Technical School in 1964, Senior Researcher of the RF Defense Ministry's Central Research Institute, author of 6 publications in the field of military planning.
