Bauman Moscow State Technical University, Moscow, 105005, Russia

Features of information technologies exploitation in nanoengineering are discussed. It was shown that an application of supercomputers allows to model complex nanosystems. Several approaches to data visualization and data mining are discussed. Application of artificial intelligence methods to nanoengineering are outlined.

Keywords: *informatics, nanoengineering, knowledge engineering.*

Zinchenko L.A., Dr. Sci. (Eng.), Professor of Bauman Moscow State Technical University. Author of 170 publications, specializes in the field of CAD of nanosystems. e-mail: lzinchenko@bmstu.ru

Shakhnov V.A. graduated from Bauman Moscow Higher Technical School in 1966. Dr. Sci. (Eng.), Professor, Corresponding Member of RAS, Head of the Design and Technology of Production of Electronic Apparatus Department of bauman Moscow State Technical University. Author of 203 publications, specializes in the field of nanoengineering, science intensive and information technologies, design of electronic equipment.
