
On some properties of shear-free null congruences

© V.N. Trishin

Bauman Moscow State Technical University, Moscow, 105005, Russia

The properties of shear-free null congruences in Einstein spaces are considered. The integrability conditions are treated in detail using a spinor framework. A useful representation for Sommers vector is obtained in algebraically special vacuum space-times.

Keywords: *shear-free null congruences, algebraically special metrics, Einstein equations.*
