The results of the analysis of the errors introduced in the formation of the boundary conditions at the outer edge of the boundary layer using widely used practice of an approximate approach to solving this problem are considered. A modification of this approximate approach, the application of which can significantly reduce the errors of the respective accounts is suggested.

Keywords: *boundary layer, boundary conditions.*

Gorsky V.V. (b. 1939) graduated from Ordzhonikidze Moscow Aviation Institute in 1963. Dr. Sci. (Eng.), Professor, Chief Researcher of the JSC "MIC "NPO Mashinostroyenia". Author of 133 publications. Scientific interests: heat and mass transfer, thermal protection. e-mail: gorsknat@yandex.ru.

Gorskaya N.A. (b. 1940) graduated from Ordzhonikidze Moscow Aviation Institute in 1964. Ph.D., Assoc. Professor of the Moscow State University of Instrument Engineering and Informatics. Author of 35 publications. Scientific interests: heat and mass transfer, thermal protection. e-mail: gorsknat@yandex.ru.

Olenicheva A.A. (b. 1979) graduated from the Moscow Power Engineering Institute in 2002. Engineer of the JSC "MIC "NPO Mashinostroyenia". Author of 10 publications. Scientific interests: heat and mass transfer, thermal protection. e-mail:guilanna@rambler.ru
