The methods of selection of retroreflective objects from diffuse objects with the adaptive thresholding of frames difference are considered. An algorithm is presented for filtering the diffuse objects on the binary images.

Keywords: *hidden cameras detection, pinhole lens, thresholding, binary image, closing on the image, image segmentation, objects filtering.*

Bokshansky V.B. (b. 1969) graduated from Bauman Moscow State Technical University in 1993. Ph. D., Head of the sector, Assoc. Professor of the Laser and Optoelectronic Systems Department of Bauman Moscow State Technical University. Author of more than 40 publications in the field of laser location and optoelectronic devices and systems. e-mail: vassily@bmstu.ru

Yeo Taewoon (b. 1978) graduated from Bauman Moscow State Technical University in 2008. Post-graduate of the Laser and Optoelectronic Systems Department of Bauman Moscow State Technical University. Author of several publications in the field of laser location and laser imaging.

Vyazovykh M.V. (b. 1976) graduated from Bauman Moscow State Technical University in 2000. Ph.D., Assoc. Professor of the Laser and Optoelectronic Systems Department of Bauman Moscow State Technical University. Author of over 20 publications in the field of laser location and laser imaging.

Litvinov I.S. (b. 1987) graduated from Bauman Moscow State Technical University in 2011. Post-graduate of the Laser and Optoelectronic Systems Department of Bauman Moscow State Technical University. Author of several publications in the field of digital image processing. e-mail: nightcreak@gmail.com
