The article deals with the advantages and disadvantages of a propulsion electric drive on tracked vehicles. It describes some difficulties of designing electromechanical transmission and their possible solutions. The paper presents designs of the tracked vehicles with a linear propulsion electric motor.

Keywords: *tracked vehicle, electric transmission, wheel drive unit, linear electric motor.*

Stadukhin A.A. (b. 1983) graduated from Bauman Moscow State Technical University in 2006. Assistant Lecturer of the Multipurpose Tracked Vehicles and Mobile Robots Department at Bauman University. Author of 5 publications in the field of transport machinery. e-mail: kjlactep@ya.ru

Sarach E.B. (b. 1975) graduated from Bauman Moscow State Technical University in 1999. Dr. Sci. (Eng.), Professor of the Multipurpose Tracked Vehicles and Mobile Robots Department at Bauman University. Author of 40 publications in the field of transport machinery. e-mail: kjlactep@ya.ru
